Office Action Summary	Application No. 10/050,362	Applicant(s) MAURO, EDWARD C.	
	Examiner Kevin M. Gagliostro	Art Unit 2615	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for rejections under this section made in this office action:

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,804,684 to Stubler et al.

Stubler clearly shows all of the limitations cited in claim 1. See all material cited in the specification. Referring to claim 1, Stubler describes a method for capturing metadata in a captured scene that comprises the following three elements:

- (a) Determining attributes in the scene, which may be used for deriving metadata about the scene. Specifically, Stubler describes this as initially acquiring images (figure 2, item 100) and then metadata is extracted (figure 2, item 110) from certain features (attributes) in or related to the image, thus about the scene (column 6, lines 8-12).
- (b) After image capture of the scene, reading the metadata of the captured scene from a digital representation of the captured scene. Specifically, Stubler describes extracting metadata (figure 2, item 110) from certain features (attributes) from images that are acquired (figure 2, item 100) from a digital source (which, in fact consists of a digital representation of the image or captured scene) (column 6, lines 8-12).
- (c) Uniquely processing the digital representation based on the discerned metadata. Specifically, Stubler describes this "unique processing" as placing the metadata into it's own (predefined) discernable categories (column 6, lines 31-36).

Stubler clearly shows all of the limitations cited in claim 2. See all material cited in the specification. Referring to claim 2, Stubler describes the method as in claim 1, wherein step (c) includes providing the user either a URL address, time/date or a discount advertisement or providing a processor of the digital representation camera a time and/or date indication. Specifically, Stubler includes providing the user with time/date, as it is data that represents objective attributes (column 6, lines 18-20).

Stubler clearly shows all of the limitations cited in claim 3. See all material cited in the specification. Referring to claim 3, Stubler describes the method as in claim 1, wherein step (b) includes discerning facial characteristics in the scene or

predetermined landmarks. Specifically, Stubler describes region metadata that includes detecting regional features such as face, skin, etc. (hence, facial characteristics) (column 6, lines 55-62).
